

How To Use The Patient Portal

Once web enabled, a patient will be able to utilize MAXhealth Patient Portal as follows:

“My Account” – update:

- **Personal information:** name, DOB, marital status, gender, address, phone numbers, email address, PCP, referring provider, select default facility, and emergency contact
- **Additional Information:** pharmacy, street address (if different from mailing address), employer, contact 1 and contact 2 (Optional)
- Reset Password
- Link devices

“Messages” – send:

- Refill Requests
- Non-Urgent Message to care team

“Medical Records” – view:

- Visit Summary
- Referrals
- Lab/Diagnostic Results (once published to Portal by the Provider)
- Immunization History

“Appointments” – view:

- Upcoming and Past appointments

“Questionnaires”:

- Complete available questionnaires to save time

The patient can utilize trackers to log progress of exercise, caloric intake, heart rate, sleep patterns, blood pressure, and blood glucose, etc. The patient also has access to review patient education suggested by the provider and view additional practice details.
